

I feel a strong connection with this lamp as it is very close to me (stands next to my bed). I was really fascinated by the multiple uses this lamp could provide. I got this lamp in a steal deal on Amazon for just \$25.99. This lamp has made my life easier and also at an arm distance while I am lying down on my bed. Not only does this lamp emit 3 different moods of light. But also, it has a stand for my iPad, watch and my laptop. It also has 3 different sections where I can keep my other stuff as well. Furthermore, this lamp has a switch board with 2 USB ports and a power plug port to charge all my devices. Earlier, I used to wake up at midnight to unplug my laptop's charging cable as I used to keep it on my study table which is at the other end of my room. But now, I can simply take out the plug while lying on my bed. This lamp made my life so easy.
